Teaching Notes

These pages are designed to help children practice the strokes needed to learn to write the letters of the alphabet. You may have the student complete them in any order. Each page prepares students to write one or more letters. The table of contents lists the letters that are supported for each activity.

Model each activity so that the student will know what to do on each page. Make your expectations clear that the student will work carefully without being in a hurry. At the same time, an extremely slow, overly careful approach is not helpful either. Modeling the correct pace and arm movements will help the student find a good working rhythm.

Make copies of the pages so that students can repeat any exercise that they like, or that they need to practice.

Students will enjoy using the pages with a set of colored pencils. Students can do the rainbow page using a different colored pencil in each path. On the other pages, students may want to do a page in one color first, then switch to a different color to repeat the page, and then to a different color to do it again.

Explain to the students that using these pages will be fun, but will also prepare them to write letters easily and beautifully. Talk about how this type of practice can help them learn to move their pencil smoothly in any direction on the paper. After spending some time practicing the exercises, students will not have to stop and think about how to make the various strokes. This will make writing and copying much easier.

Encourage students to draw and color their own pictures. This provides more practice to prepare students to handle a pencil comfortably so that learning to write is easier.

Raindrops

Draw a line from each raindrop straight down to the ground.

Leaf Drop

Draw a line from each leaf straight down to the ground.
