

Sight Word Game

In this activity, students practice reading sight words.

Materials

- Small color-coded sight word flashcards
- One die
- Pencil and paper to keep score

To prepare the activity: Print the small flash card pages on white card stock. Laminate the pages if desired for extra wear. Cut the cards apart and store in an envelope or plastic bag. Print extra cards for the first words so that you will have enough cards to get started playing the game.

Selecting The Pieces: Use the cards for the sight words that have been introduced. Keep the remaining cards separate. Each time a new sight word is learned, add its card to the stack of cards that will be used.

Setting up the game: Place the sight word cards face down in a stack or spread out on the table.

To do the activity:

- Students take turns selecting a sight word card. If they can read the card aloud, they place it face up in front of them. As they select more cards and read them correctly, they continue to place them face up near the first card, arranged in a grid so all the words can be seen. These cards do not yet "belong" to the student.
- After taking a turn and successfully reading a card, the student rolls the die and follows the instructions shown, which apply to any cards that are face up on the table. Any cards taken go into a pile that belongs to that student.
- After all of the cards have been selected, read, and taken, the student with the most cards wins.

Take your own cards.

Do nothing.

Take the cards from the person on your right.

Take the cards from all players, including your own.

Do nothing.

Take your own cards.
